

HABIBURAHMAN A

PRODUCT OPERATIONS | BUSINESS ANALYST | PROJECT COORDINATION

Chennai, Tamil Nadu, India. | +91-9585652148 | habiburahman825@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Business Analyst / Product Operations professional with experience in SaaS product environments, supporting requirements analysis, stakeholder collaboration, process improvement, UAT, release management, defect resolution and operational reporting. Experienced in translating business and user needs into requirements, user stories, acceptance criteria, workflow documentation and test scenarios. Hands-on experience working with Product, Engineering, QA, UX and Customer Success teams in Agile/Scrum environments. Skilled in Advanced Excel, SQL, Power BI, Jira and data-driven process analysis.

CORE SKILLS

Business Analysis: Requirements Gathering & Analysis, Business Requirements, Functional Requirements, BRD, FRD, PRD, User Stories, Acceptance Criteria, Process Analysis, Process Mapping, Workflow Analysis, Stakeholder Management

Project & Agile Delivery: Project Coordination, Agile, Scrum, Sprint Planning, Backlog Refinement, Release Management, UAT Coordination, SDLC, Cross-functional Collaboration, Issue Tracking

Data & Reporting: Advanced Microsoft Excel, SQL, Power BI, Power Query, Pivot Tables, KPI Reporting, Data Analysis, Data Visualisation, Trend Analysis, Microsoft Fabric

Quality & Product: UAT, Functional Testing, Regression Testing, Smoke Testing, Test Case Design, Defect Lifecycle Management, Root Cause Analysis, Release Validation, Product Operations, Process Improvement

Tools & AI: Draw.io, GitHub, Jira, Microsoft 365, Microsoft Copilot, ChatGPT, Gemini, Claude, Perplexity

PROFESSIONAL EXPERIENCE

ARK TECH INNOVATION PVT LTD	Product Operations Analyst	July 2024 – Present
ARK INFO SOLUTIONS PVT LTD	Customer Support Engineer	May 2020 – June 2024

ARK TECH INNOVATION PVT LTD | JULY 2024 – Present

Career Progression: Customer Support Engineer (Jul 2024 – Mar 2025) -> Product Support Analyst (Apr 2025 – Mar 2026) -> Product Operations Analyst (Apr 2026 – Present)

- Prepare and maintain BRDs, FRDs, PRDs, Use Case Documents (UCDs), SOPs, release notes, process maps and workflow diagrams throughout the product lifecycle.
- Analyse customer feedback, product usage, KPI trends and recurring issues to identify business/process gaps, product opportunities and workflow improvements.
- Participate in sprint planning, backlog refinement, stakeholder discussions and release readiness activities, coordinating cross-functional teams to support successful product delivery.
- Translate business and user needs into functional requirements, user stories and acceptance criteria, supporting Agile development and stakeholder alignment.
- Collaborate with Product, Engineering, QA, UX and Customer Success teams to gather, analyse and clarify business requirements for SaaS product enhancements.
- Collaborate with UX and Product teams to analyse user journeys, workflows and usability gaps, recommending improvements to product navigation and user experience.
- Work with Engineering throughout Agile/Scrum sprint cycles to clarify requirements, resolve functional questions, validate implementation and support backlog refinement.
- Perform UAT, functional testing, regression testing and release validation to verify that delivered functionality meets defined business requirements.
- Track defects through Jira, perform Root Cause Analysis (RCA), coordinate resolution with Product/Engineering/QA teams and validate fixes before release.
- Use SQL to validate backend data, investigate data discrepancies and support data-driven root-cause analysis and issue resolution.
- Develop operational reports and KPI dashboards using SQL and Advanced Microsoft Excel to analyse trends and support data-driven decision-making.
- Manage end-to-end SaaS issue resolutions across multiple clients while maintaining service quality and SLA commitments, analysing recurring issues to identify product and process improvements.
- Document workflows, issue patterns and solutions to improve knowledge sharing, operational consistency and issue-resolution efficiency.
- Identified critical defects during staging and pre-release validation, contributing to improved product stability and reduced production issues

ARK INFOSOLUTIONS PVT LTD | May 2020 – June 2024

Career Progression: Faculty Member (May 2020 – Mar 2022) -> Customer Support Engineer (Apr 2022 – June 2024)

- Delivered technical and customer support through chat, email and phone/telephonic interactions, maintaining SLA compliance across multiple customer interactions.
- Handled inbound and outbound customer calls to understand user concerns, provide product guidance, follow up on unresolved issues, and ensure timely closure.
- Diagnosed platform issues, investigated recurring problems, and provided timely resolutions while maintaining clear and professional communication with customers.
- Gathered customer feedback through calls, emails and support interactions, identified recurring pain points, and shared actionable insights with product teams to support product improvements.
- Assisted with customer onboarding, product adoption and user engagement through product demonstrations, telephonic guidance, issue resolution and follow-ups.
- Coordinated with internal teams to escalate, track and follow up on customer issues, ensuring effective communication and timely resolution.
- Delivered training in coding, 3D design and digital tools to diverse learner groups through structured sessions and hands-on guidance.
- Designed structured curriculum, assessments and learning activities aligned with defined learning outcomes.

SELECTED PROJECTS

Business Analysis & Product Delivery | KMS / LMS SaaS Platform | 150+ Schools

- Analysed user behaviours, support data and stakeholder feedback to identify product gaps, usability issues and workflow improvement opportunities.
- Translated user needs into requirements, user scenarios and functional validation criteria.
- Collaborated with Product, UX and Engineering teams to improve workflows and user journeys.
- Created test scenarios, test cases and QA documentation for structured feature validation.
- Performed end-to-end functional, regression and UAT testing to support stable product releases.
- Used SQL to validate data accuracy and troubleshoot backend issues.
- Led onboarding sessions, product demos and user training to support adoption and successful feature usage.
- Payment data and renewal cycle data preparations

Impact: Improved release quality through pre-release validation and defect identification; enhanced user experience through workflow and usability improvements.

EDUCATION

B.E. Mechanical Engineering | 2016 – 2020 | 78% | SCAD College of Engineering & Technology, Cheranmahadevi
Higher Secondary Education (+2) | 2014 – 2016 | Government Higher Secondary School, Vembar
